SUPPLEMENT TO  
REPORT NO.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. The State Factory for Dry Distillation of Wood in Hajnowka (S53/G74, near Bialystok) is supplied with raw material from the nearby Puszcza Bialowiezka (Bialowieza Forests). However, only 10 percent of the requirements of this factory are met since the forests were devastated by the Germans during the war. The remainder of the timber is supplied from other forested areas in Poland.
2. The factory manufactures 14 basic products widely used in medicine and industry.
3. The production capacity amounts to 100-150 cubic meters per 24 hours; work is performed in three shifts. Before the war and during the German occupation the output was 250 cubic meters.
4. The yield per cubic meter of wood is:
  - a. 100 kg. of charcoal
  - b. 18 kg. of acetic acid
  - c. 6 kg. of wood alcohol
  - d. 30 kg. of wood tar
5. The factory has its own power station with an installed power of 350 kw, a gas pumping station, and mechanical and electro-technical workshops.
6. A large sawmill, employing 350 workers, is attached to the factory.
